BUREAU OF VITAL STATISTICS

Statistics for 1921.

I present herewith, as part of the annual report of the State Board of Health, the official compilation and tabulation of births and deaths occurring in Missouri during the year 1921.

Respectfully submitted,

JAMES WARK, Statistician.

Jefferson City, Mo., December 31, 1921.

VITAL STATISTICS FOR 1921.

For year ending December 31, 1921, there was reported by the local registrars throughout the state a total of 36,210 deaths and 66,970 births.

The death rate for the state in this period was 10.6 per 1,000 population and the birth rate was 19.6 per 1,000 population.

Registration of Stillbirths.

On another page in this report will be found tables giving in detail statistical information pertaining to these events.

Stillbirths are not included with either births or deaths in the compilation of statistics, but in all instances are excluded and compiled under separate and distinct heading.

Infant Mortality.

Of the 36,210 deaths from all causes reported by the local registrars throughout the state, a total of 4,531 deaths occurring in infants under one year of age, or 12.5 per cent of the total number of deaths, and a rate of 14.5 per 100,000 population.

Congenital malformation caused 287 deaths or 8.4 infants out of every 100,000 population died of the disease.

Congenital debility (icterus, scleroma, etc.,) claimed 219, a death rate of 6.4 per 100,000 population, while other diseases of early infancy resulted in 1,518 deaths per 100,000 population, a rate of 44.5 per 100,000 population.

There were 1,957 deaths between the ages of one and four years, a per cent of 54.4 of all deaths during the year, or a rate of 57.4 per 100,000 population.

Diarrhoea and Enteritis (Under Two Years of Age).

The above terms for statistical purposes include cholera infantum, gastro-enteritis, milk infection, intestinal toxæmia, etc. During the year 1921 returns to the Central Bureau numbered 929 showing the above as the cause of death of children under two years of age. This is a death rate of 27.2 per 100,000 population.

Typhoid Fever.

Typhoid fever caused 416 deaths in the state during the year 1921, or, in other terms, 12.23 persons out of every 100,000 population died of this disease.

Diphtheria and Croup.

There were 705 deaths from diphtheria and croup in 1921, the death rate being 20.71 per 100,000 population.

Influenza.

To influenza was charged the cause of 203 deaths during the year 1921. This is a death rate of 5.96 per 100,000 population.

Tuberculosis—All Forms.

Three thousand, and ten (3,010) deaths from this disease were recorded as having occurred in the state during the year 1921, a death rate of 88.4 per 100,000 population.

Measles.

For the year 1921, 23 deaths due to measles were reported to the Central Bureau, the death rate being .68 per 100,000 population.

Scarlet Fever.

116 deaths were caused by scarlet fever during the year 1921, the death rate being 3.4 per 100,000 population.

Whooping Cough.

Whooping cough caused, during the year 1921, 147 deaths, a rate of 4.3 per 100,000 population.

Pellagra.

There were registered in the Central Bureau for 1921, 16 deaths as due to the above title, a death rate of .47 per 100,000 population.

Cancer.

Cancer caused 2,669 deaths in the state during 1921, a rate of 78.4 per 100,000 population.

Acute Anterior Poliomyelitis—Infantile Paralysis.

Fourteen deaths occurred in the state in 1921 from this disease, or, in other words, a death rate of .41 per 100,000 population.

Organic Diseases of the Heart.

Under the above title all organic diseases of the heart are included (chronic, valvular diseases, myocarditis, etc. There were returned to this office 5,679 death certificates on which the various organic diseases of the heart were given as a cause of death, this being a death rate of 166.5 per 100,000 population.

From "other diseases of the circulatory system" (pericarditis, chronic endocarditis, diseases of the arteries, etc.) 913 deaths resulted, being a death rate of 26.5 per 100,000 population.

Pneumonia—All Forms.

Pneumonia (all forms) resulted in 3,225 deaths during the year 1921, a rate of 94.7 per 100,000 population.

Of the deaths from all forms of pneumonia which occurred in Missouri during the year 1921, 1,527 of this number were due to lobar pneumonia, a rate of 44.8 per 100,000 population. The number of deaths due to broncho-pneumonia was 1,553, or a rate of 45.6 per 100,000 population. The remaining 145 deaths were due to undefined pneumonia.

Nephritis.

During the year 1921, 2,868 deaths were returned as due to nephritis, a death rate of 84.2 per 100,000 population.

Suicides.

456 deaths due to suicide occurred in the state in 1921, this being a death rate of 13.3 per 100,000 population.

Of the 456 suicides occurring in this period, 150 were caused by poison, 175 by firearms, 52 by hanging, while the remaining 79 were caused by various other means.

Accidents.

Accidents were responsible for 1,595 deaths in the state during 1921, a death rate of 46.8 per 100,000 population. Death by traumatism from railroad 170, street cars 29, automobiles 248, traumatism by fall 270, burns 146 (conflagration excepted); accidental drowning 141, accidental poisoning 86, traumatism by firearms 69, inhalation of deleterious gases 34, traumatism by animals 4, traumatism in mines and quarries 36, traumatism by machinery 41.

The accidents causing the remaining 321 deaths are shown in the international causes of death of this report.

Homicides.

Homicides numbered 325 in the state in 1921, a death rate from this cause of 9.54 per 100,000 population.

231 of the 325 murders were caused by firearms.

DEATHS.
